Interview Response Analysis

Response:

"I know Python very well. I have worked on machine learning projects and I am passionate about AI."

Category	Score (/10)	Feedback
Communication Skills	7/10	The response is concise and easy to understand. However, it lacks specific examples and details that would make the communication more impactful.
Confidence Level	8/10	Phrases like "I know Python very well" and "I am passionate about AI" convey confidence. Supporting these claims with achievements would make the confidence more credible.
Clarity	8/10	The message is clear and straightforward. The interviewer can quickly understand your skills and interests.
Grammar	10/10	The response is grammatically correct with proper sentence structure and punctuation.
Overall Interview Performance	7.5/10	The answer provides a good overview of technical skills and interest in AI, but it is too generic. Interviewers typically look for evidence, examples, and measurable achievements.

Strengths

- Clear and concise.
- Demonstrates technical knowledge (Python, Machine Learning).
- Shows enthusiasm for AI

ONE - SHOT PROMPTING

Example:

Review:

"The delivery was late and the package was damaged."

Output:

Sentiment: Negative

Reason: The customer is dissatisfied due to delayed delivery and damaged packaging.

Now analyze:

Show more ▾

1. **Sentiment:** Positive

2. **Reason:** The customer expresses satisfaction because the product was delivered on time and performs exactly as expected, indicating a positive experience with both delivery and product quality.

FEW - SHOT PROMPTING

Example 1:

Review:

"The delivery was late and the package was damaged."

Output:

Sentiment: Negative

Reason: The customer is unhappy because of delivery and packaging issues.

Example 2:

1. **Sentiment:** Positive

2. **Reason:** The customer is satisfied because the product was delivered on time and performs exactly as expected.

ROLE PROMPTING

- STRONG ROLE PROMPTING

You are a senior customer experience analyst with 15 years of experience in e-commerce review analysis.

Your task is to:

- Identify sentiment accurately.
- Explain customer satisfaction indicators.
- Provide a confidence score.
- Justify your conclusion using evidence from the review.

Review:

"The product arrived on time and works exactly as expected."

Customer Review Analysis

Review:

"The product arrived on time and works exactly as expected."

1. Sentiment

Positive

2. Confidence Score

98/100

3. Evidence

- "arrived on time" → Indicates satisfaction with the delivery experience.
- "works exactly as expected" → Indicates satisfaction with product performance and quality.

4. Detailed Reasoning

The review expresses a clearly positive customer experience across two key dimensions:

1. Delivery Performance

- The phrase "arrived on time" shows that the seller met the customer's expectations regarding shipping and delivery.
- Timely delivery is a strong indicator of customer satisfaction in e-commerce reviews.

2. Product Performance

- The phrase "works exactly as expected" indicates that the product functions correctly and matches the customer's expectations.

- WEAK ROLE PROMPTING

You are a customer support assistant.

Analyze the sentiment of the following review:

"The product arrived on time and works exactly as expected."

Provide:

1. Sentiment
2. Reason

1. Sentiment: Positive

2. Reason: The review indicates customer satisfaction because the product was delivered on time and functions exactly as expected. Both delivery performance and product quality meet the customer's expectations, with no negative feedback mentioned.
